

SUMMARY OF SKILLS

- BI and Data Architect with 10+ years in Business Intelligence, data architecture & software development.
- Excellent verbal and written communication skills and the work ethic and social skills to Get The Job Done.

Technology Skills

- BI: QlikView, Qlik Sense, Tableau.
- Databases: DB2, Oracle, PostgreSQL, SQL Server.
- Scripting: Python and SQLAlchemy.

Industry and domain experience

- Financial: General Ledger, Bookings, Sales, Revenue, Accounts Payable & Receivable, Loans and Debt
- Supply Chain: Procurement, Warehousing, On Time Delivery, Master Data Management, CRM
- Manufacturing: Semiconductor fabrication including process control and recipe management
- Others: Executive Leadership views, HR, headcount, salaries and other confidential information

Experienced in all areas of the data and BI software development life cycle

- Business and Requirements Analysis including prototyping and mockups.
- Rapid development of dashboards, including refinement through customer sessions. Imaginative use of charts and advanced features to convey accurate information and enable good decisions.
- Technical and end user documentation, in Word, PDF and wiki formats.
- Built a portable database catalog and dictionary for database schema analysis, modeling and data quality.
- **Extensive experience with the ETL lifecycle** with data sources ranging from flat files, REST APIs, source databases (DB2, Oracle, Postgres, SQL Server) with **hundreds of millions of records processed daily**.
- Design and architecture of multi-tier QlikView applications, including tiered, incremental and time slice loading.
- Engineered dashboard updates starting with daily updates increasing in frequency to every 5 minutes.
- Testing, troubleshooting and performance tuning in development, staging and Production environments.
- Version control of dashboards and scripts using Git for traceability and governance.

QlikView BI and Qlik Sense Application Development

- Pioneered the use of QlikView BI business intelligence product in semiconductor manufacturing.
- Developed QlikView dashboards for many industries, with hundreds of users in multiple departments.
- Data sources included hundreds of millions of records stored in multiple databases and data warehouses.
- Experienced with Qlik Sense and Qlik Sense Cloud and migration of QlikView documents to Qlik Sense.
- Report writing using Qlik NPrinting for Excel, PowerPoint and embedded email.
- Geo Analytics map dashboard development, including contributions to underlying OpenStreetMap data.
- Re-use of existing SQL queries and views when required. Reverse-engineering of existing SQL queries and views to implement them in a QlikView-centric architecture.
- Creation and management of QlikView QVD data files in multiple tiers for use and reuse.
- Development of QlikView star schema data model, with facts surrounded by dimensions.
- Training and mentoring for QlikView end users, developers and BI staff.

QlikView and Qlik Sense System Administration Support

- Installation, upgrade and support of Qlik Server cluster, GeoAnalytics and NPrinting.

MOST RELEVANT WORK EXPERIENCE

Haas / Wesco / Incora, Austin, Texas

QlikView Architect and Consultant, 2013 - 2022

- Comprehensive consulting services to BI team using Qlik products to support supply chain operations
- Built or provided support to numerous dashboards including:
 - Quotes, Bookings and Sales vs Budget and COGS for hardware and chemicals, including unbilled revenue estimates for accurate revenue projections.
 - Oracle CRM.
 - On Time Delivery of product to customers.
 - Corporate General Ledger from SAP and JD Edwards ERP systems.
 - Accounts Payable and Receivable including overdue accounts from SAP and JD Edwards.
 - SAP FICO module data.
 - Human Resources including confidential salaries joining disparate HR systems.
 - Executive Leadership Team summary views.
 - Database explorer and data dictionary builder for JD Edwards ERP and other databases.
 - Migrated 24 key reports from legacy Cognos system to QlikView for \$440K annual savings.
 - Provided support to Excess & Obsolete Parts dashboard to manage \$200M reduction strategy.
 - Provided support to development of automated sales margin analysis tools.
- Notable technologies and methodologies used:
 - QlikView, Qlik Sense, Qlik NPrinting, Qlik GeoAnalytics, Qlik Cloud.
 - Daily incremental loading from DB2, Oracle, PostGRES and SQL Server into QVD files using ODBC and OLE DB to support three-tier architecture.
 - Web service calls to obtain data from cloud locations.
 - Created REST API to enable client's customer to obtain customer's data from client's Qlik Sense server.
 - Active Directory user and group list using scripting .
 - Encrypted data transfers and Access Control for sensitive information.
 - Dynamic user-customizable table report with over 70 dimensions and 40 metrics available.
 - Maps of customer, supplier and warehouse locations and sales using GeoAnalytics.
 - Cleanup of address book and master data to work correctly with map technology.
 - International currency conversions using exchange rate feeds.
 - Simple and complex time window comparisons.
 - Load script include file for commonly used tasks.
 - Python helper scripts.
- Qlik system administration support including:
 - Installation, upgrade and support of Qlik Server cluster, GeoAnalytics and NPrinting.
 - Wrote utilities and monitoring dashboards to monitor users, licenses, ETL success, dashboard usage and server resource usage to support 99.9% uptime.
 - Created a remote database loader to improve WAN transfers of large datasets between datacenters.
 - Version control of QlikView dashboards, scripts and config files using Python and Git.
- QlikView end-user and developer training and mentoring in the US and UK.
 - On-site hands-on training for 40 developers in 5 locations.
 - Helped develop best practices and templates for new dashboards.
 - Mentored and guided junior BI staff, serving as expert resource.
 - Developed excellent working relationships across the customers' organizations.

EDUCATION

- **Master of Science** in Chemical Engineering, Arizona State University, Tempe, Arizona, 1994.
- **Bachelor of Engineering** in Chemical Engineering, Karnataka Regional Engineering College (now National Institute of Technology, Karnataka), Surathkal, India, 1991.
